

EDUC 100C Cal Teach 2 Science Seminar

**EDUC 100C - Spring 2016**

**CAL TEACH 2 SCIENCE SEMINAR**

**Tuesday 6:00 to 7:45 p.m.**

Course Instructor: Sarah Baumgart

E-Mail: [sbaumgar@ucsc.edu](mailto:sbaumgar@ucsc.edu)

Office Hours: Tuesday before or after class

Web page: [http://calteach.ucsc.edu/People\\_/Instructors/Baumgart.html](http://calteach.ucsc.edu/People_/Instructors/Baumgart.html) (readings & handouts)

### **Course description**

This seminar is a continuation of Cal Teach1, and is open to students enrolled in the Cal Teach program. The goals of Cal Teach2 are to get you thinking critically about how you will teach, planning how you will teach, and finally designing a lesson, which you will teach in your host classroom. How does a good teacher impart knowledge? We will discuss this question through various perspectives, and help you to define yourself as a teacher.

### **Course requirements**

1. Attend all seminars, complete all assignments, and participate in discussions. Please contact me ahead of time if you must miss a seminar. Three absences will cause you to be dropped from the program. More than one absence will lower your grade. Participation in seminar is expected where you are engaged in discussions with your peers and instructor, using electronic devices during seminar is not participatory and the instructor will ask you to remove it. You will be teaching a mini-lesson, much like the soapbox lessons of CAT 1. **Use the mini-lesson to teach a simple topic in 10 minutes.** This lesson should have a “hook” in the introduction, contain direct instruction, checks for understanding, independent practice and end with closure. There is not a written portion to this assignment. **Presented weeks 4-6.**
2. Written Observations (5) based on a different aspect of good teaching as observed in your host classroom. When not directly stated in the assignment, choose a “focus” for the observation. We will brainstorm a list of focus topics in the first seminar. Then, include reflection (for example: is this how you would have taught that concept or dealt with that student, etc.), and make connections between what you observe and what we talk about in seminar. In addition, include any classroom involvement. Examples include: working with students individually or in small groups, leading or designing a review activity, introducing a lab or activity, grading an assignment, and so on working up to teaching the whole class. Please **print** these observations and give them to me at seminar. If **late** they will be scored down by **25%**.
3. Four short papers (1-2 pages long is typical) based on the readings and the specific assignments connected to them. Please **print** and give to me at seminar. **Late papers are marked down 25%.**
4. Design a draft lesson, a final lesson and teach it. You and your host teacher will collaborate on the content and scheduling. **(Discuss and arrange this ASAP!)** Include in this project one or more **vocabulary activities** and make sure this lesson has **active student participation, checks for understanding** and an **assessment**. This lesson must **not** be only lecture based. Your grade on this project will be determined by your adherence to the project-grading rubric, which is included with the sample lesson plan template. You will introduce your lesson and are encouraged to “hook us” during your **10 minute presentation** and then give any student handouts created and an overview/outline of the lesson.

## Course Grading Policy

### 1. Attendance and Participation in Seminar:

10% Attendance/Involvement in Seminar

10% Mini-lesson

20% Written summary and reflection on readings. (4)

### 2. Observations and Reflections of Internship Classroom:

25% Classroom Observations with written reflections. (5)

### 3. Content Standard Planning and Teaching Project:

35% Final Lesson Plan and Reflection

## Readings in alphabetical order

1. Griffiths, P. (2000) "How a teacher can influence a whole life", *The New York Times* 9/3/00
2. Krajcik, J. and Merritt, J. (2012) "Engaging Students in Scientific Practices: What does constructing and revising models look like in the science classroom?" *The Science Teacher*, NSTA March 2012
3. Marzano, R. (2003). Rules and procedures. *Classroom Management that Works*. Association for Supervision and Curriculum Development, Alexandria, VA
4. Marzano, R. (2004). Direct vocabulary instruction: An idea whose time has come. *Closing the Achievement Gap*. Belinda Williams, (ed.). Association for Supervision and Curriculum Development, Alexandria, VA
5. McDonnough J and Cho, S (2011) "Making the Connection; Practical Techniques for Accommodating English Language Learners in the science classroom" *The Science Teacher*, NSTA, March 2009
6. Perfors, A. (2008) "Another classroom demo: The scientific method." *California Journal of Science Education*, Vol. VIII, Issue 2 (Spring, 2008)
7. Rosenshine, Barak (2010) "Principles of Instruction: Research-Based Strategies That All Teachers Should Know", *American Educator*, Vol.36, No. 1 Spring 2012. Online available <http://www.aft.org/pdfs/americaneducator/spring2012/Rosenshine.pdf> 4/1/12
9. Ross, Terrance F (2014) "How Black Students Tend to Learn Science", *The Atlantic*, December 2014. Online available. <http://www.theatlantic.com/education/archive/2014/12/how-black-students-tend-to-learn-science/383387/>

11. Santa Cruz, Rafalela M. and Sanchez-Gutierrez, Ivette (March 2009). "Supporting Writing Skills in English Language Learners", *NCTM News Bulletin*. <http://www.nctm.org/news/content.aspx?id=2147483746>
12. Lesson Design. [http://members.tripod.com/teaching\\_is\\_reaching/lesson\\_design.htm](http://members.tripod.com/teaching_is_reaching/lesson_design.htm)

13. The “Rule of Four”

14. Teaching Tips to Promote Active Learning, Class Participation and Effective Teaching, adapted from “Student Participation/Active Learning”, University of the Sciences in Philadelphia.

**Schedule of class meetings**

<b>IN CLASS: Activities and Expectations</b>	<b>OUTSIDE CLASS: Preparation for next meeting</b>
<p><b>Week 1 – March 26</b>            Introductions            Discuss course syllabus, Cal Teach Intern Activity timesheet/log and writing rubric, Host Teacher Evaluation.            Brain-storm topics for observation</p> <p>Discuss format for observational paper; includes 30 minutes of formal observation (teacher did, students did) followed by a reflection of what you thought about the lesson and how you focused your observation.</p>	<p><b>Reading #1:</b>  <i>“How a teacher can influence a whole life”</i>  <i>“Another classroom demo: The Scientific Method”</i></p> <p><b>Observation #1:</b> Write a formal observation for 30 minutes. Then write your general reflections. Note the physical attributes of the classroom along with the general atmosphere of the class. How does the teacher relate to the students? Are interactions formal or informal? Are there cooperative activities or does this seem a lecture class? What are your impressions of the teacher’s style?</p>
<p><b>Week 2 – April 5</b></p> <p>Discuss Reading #1 and your observations.</p> <p>Class Discussion of Common Core Standards &amp; Next Generation Science Standards.</p> <p>Brainstorming for student mini-lesson topics: using a science standard, work in a group of three to four to plan a 10 minute lesson using some of the practices of active learning.</p> <p>Review mini-lesson Rubric. Adjust if necessary.</p>	<p><b>Reading #2:</b>            NGSS Performance Expectations.            Links available on class website.            “Rules and Procedures”            “Teaching tips to promote Active Learning, Class Participation and Effective Teaching”</p> <p><b>Assignment #1: Part 1</b> Describe the difference between classroom rules and classroom procedures. Then choose 3 of the 6 general categories as described in depth under the section: Action Step One and describe how you might incorporate these in your future classroom or even in your Hosts classroom now.  <b>Part 2</b> Describe 3 of the 43 suggested teaching tips and discuss how you might apply these in a science classroom and how you think they would be helpful in increasing student achievement. The writing rubric will be used to grade your assignment.</p>
<p><b>Week 3 – April 12</b>            Discuss reading #2 and your observations</p> <p>Work in a different group of 3 to 4 students to create a mini lesson using a science standard.</p> <p>Sign up for mini-lessons next 2-3 classes.</p> <p>Model Lesson for active participation.</p>	<p><b>Reading #3</b>  <i>“Direct Vocabulary instruction”</i>  <i>“Rule of Four”</i></p> <p><b>Observation #2:</b> Write a formal observation for 30 minutes. Choose a focus from the brainstorm list. Then write your general reflections.</p>

<p><b>Week 4 – April 19</b> Discuss reading #3 and observations.</p> <p>Student Mini-lessons presentations (3) (using one or more techniques from the readings or discussions)</p>	<p><b>Reading #4</b> <i>“Principles of Instruction”</i> <i>“How Black Students Tend to Learn Science”</i></p> <p><b>Assignment #2 Part 1</b> Chose at least 5 of the 10-17 principles of effective instruction to that you can use in your mini lesson or class lesson. Describe in detail how your lesson can incorporate these.</p> <p><b>Part 2</b> Write a reflection about active participation of students in STEM classes you have taken and what you think about the article. The writing rubric will be used to grade your assignment.</p>
<p><b>Week 5 – April 26</b> Discuss reading #4 and observations.</p> <p>Student Mini-lessons (4) Review Lesson Template and Demonstration Lesson</p> <p><b>Sign up for Lesson Presentations weeks 8-10</b></p>	<p><b>Reading #5</b> <i>Lesson Design</i></p> <p><b>Draft of Lesson – Must be word processed!</b> Use the lesson plan template to prepare a draft of your lesson that will be turned in as a final project and taught in host classroom. Include strategies and teaching tips that you have learned in the readings and class discussions.</p>
<p><b>Week 6 – May 3</b> Discuss observations.</p> <p>Student Mini-lessons (continued if needed)</p> <p>Class activity: Collaborative Lesson Planning and meet with instructor for clarifications and changes.</p> <p>Collect draft lessons</p>	<p><b>Reading #6</b> <i>“Making the connection”</i> <i>“Support writing skills in ELLs”</i></p> <p><b>Assignment #3:</b> Summarize and reflect on the reading. Choose a strategy presented in your reading and apply it to a standard being taught in the classroom you are interning in. The writing rubric will be used to grade your assignment.</p> <p><b>Observation #3:</b> Write a formal observation for 30 minutes. Then write your general reflections.</p>
<p><b>Week 7 – May 10</b> Discuss reading #6 and observations.</p> <p>Return drafts lessons</p> <p>Class activity: Collaborative Lesson Planning for Final Projects and meet individually with instructor for clarifications about draft lesson.</p>	<p><b>Reading #7</b> <i>“Engaging Students in Scientific Practices”</i> <i>“Giving Voice to ELLs in Mathematics”</i></p> <p><b>Observation #4:</b> Write a formal observation for 30 minutes. Then write your general reflections.</p> <p><b>Assignment #4:</b> Summarize and reflect on your reading. How could these same techniques serve Special Education students (SPED)? The writing rubric will be used to grade your assignment.</p>
<p><b>Week 8 – May 17 - substitute</b> Discuss reading #7 and observations. Lesson Presentations (1-4)</p>	<p>Work on writing/revising your formal lesson plan.</p> <p><b>Final Lesson Plans Due May 24</b></p>
<p><b>Week 9 – May 24</b> Discuss observations.</p> <p>Lesson Presentations (5-7)</p>	<p><b>Observation #5:</b> Write a formal observation for 30 minutes. Then write your general reflections.</p>
<p><b>Week 10 – May 31</b> <b>Final Class – Attendance Required.</b> Lesson Presentations (if needed)</p> <p><b>Any work turned in after class (in any form) will be marked down by 25%.</b></p>	<p><b>All class assignments and classroom documentation (blue paper timesheet and host teacher evaluation) should be completed and turned in by this class. Please email any remaining work to me, or hand-deliver printed copies to the Cal Teach Office, clearly labeled with my name.</b></p>

**Monitoring & Assessment:**

How will you monitor student learning during the lesson? How will you assess student work?

**Modifications to Address Individual Student Learning Needs**

How will you modify your instruction as needed to ensure that all students meet learning outcomes?

**Follow-up Activities/ Homework**

How will you follow up this lesson with homework or other extension activities?

## **Lesson Plan Grading Rubric for EDUC 100C Cal Teach 2 (Baumgart)**

Spring, 2015

Under the course requirements for the Cal Teach 2 class, you will find the following description of the lesson-plan component:

“Design and teach a lesson. You and your host teacher will collaborate on the content and scheduling. Include in this project one or more assessment tools that you will use after your lesson to determine how successfully you imparted new information to your students along with at least one vocabulary activity or assignment. Your grade on this project will be determined by your adherence to the project-grading rubric.” Your lesson plan project is worth 35% of your quarter grade.

I have provided you a lesson-plan template and a sample lesson, which you may find useful. If you choose instead to create your own lesson-plan structure, I will grade you on the efficacy, content, and rationale of your lesson. In any case, practically any lesson has these elements in common: engagement, exploration, explanation, extension, and evaluation.

### **Grading criteria**

Standards and Objectives, Resources (1-10 points)

1. Identify the key standard as written from the California Content Standards.
2. What skills and/or content do you want your students to learn from this lesson? What vocabulary words are “must know” for the lesson?
3. List the resources you will need for your lesson, such as textbooks, other readings, teacher-created materials, videos, lab equipment, manipulatives, computers, art supplies, etc. be specific and thorough.

Learning Activities, Assessment, and Resources (1-20 points)

1. Provide a detailed list of teacher and student activities that make up the lesson. Include details such as your prepared questions to promote discussion, special equipment, and extended tasks for early finishers. If any part of lesson is lecture, include power point slides of textbook pages used or any student handouts. Include vocabulary activities, active student participation and some form of formative or summative assessment.
2. How will you engage the students at the start of the lesson? How will you “hook” them? (Examples: review prior knowledge, demonstrate a real-world example, ask an open-ended question to elicit discussion, etc.)
3. Describe how you will monitor student progress at key points of instruction to determine whether students are achieving your lesson objectives. Where are these key points? How will you check for understanding?
4. Describe the modifications you will employ to address individual student learning needs. (ELL’s or RSP students)

Reflection (1-20 points)

1. What parts of the lesson were effective in moving students toward your objectives?
2. Why do you think they were effective? What assessment tools did you use? Examples might include: direct questioning, review activities, post-lesson quiz, summation by students, etc.
3. What parts of the lesson were not effective – or were less effective – in moving students toward your objectives? How did you know this?
4. Why do you think they were less effective?
5. How will you use this reflection to inform your plan for the next lesson, or the next time you teach this particular lesson?
6. Was the lesson your design or was it your host teachers? Do you feel this lesson demonstrated the “Principles of Good Instruction” learned in this class? Explain.
